

Seeking Home Energy Auditor in Maryland

A.J. Michaels is seeking a residential home energy auditor.

If you are already a Building Performance Institute (BPI) certified auditor, or have previous experience in the construction or home performance trades and are looking for an opportunity in a growing industry, we'd like to talk to you. A.J. Michaels is a 40 year old leading Maryland-based mechanical and home performance contractor serving the BGE and Delmarva Program territories.

This role will use diagnostic equipment to perform comprehensive home energy audits and determine how improvements throughout the home can work together to maximize energy efficiency and savings for our customers. Responsibilities include:

- Conducting a blower door test that uses the combination of pressure and airflow measurements to determine a home's air leakage.
- Thermographic camera testing using infrared images to assess the effectiveness of the home's insulation
- Combustion and safety testing to detect carbon monoxide and natural gas leaks
- Verification of adequate ventilation, which is critical to reducing indoor air pollutants, moisture and odors in the home
- Reporting and analysis through Beacon software
- Assisting with closing home performance sales

All leads are provided and there is no cold calling. We provide an experienced and supportive office staff, a vehicle allowance, health benefits, 401k and serious earning potential.

Please reply with a resume for prompt consideration to dave@ajmichaels.com.
