

Home Energy Inspector

We are currently seeking a Home Energy Inspector for our Energy Conservation Programs. Candidates will be responsible for all technical aspects of our programs and quality service to our clients.

Responsibilities include:

- Perform home energy inspections, which include client education, health and safety testing, electric usage surveys, and an estimate of energy conservation measures to be performed
- Test for efficiency of refrigerators
- Install LED light bulbs
- Write weatherization building assessments and work orders
- Inspect heating systems through technical evaluation
- Perform heat loss calculations
- Inspect weatherization work in process and provide technical advice and consultation to contractors
- Perform quality control inspections of completed weatherization and heating system work to insure uniformity with program specifications
- Other projects as needed

Qualifications:

- High school diploma
- Related experience preferred
- Massachusetts driver's license required
- Must have a reliable vehicle
- Ability to measure dimensions of residential spaces, perform calculations, and assimilate complex regulations and procedures
- Self-motivated and detail-oriented
- Ability to communicate effectively with contractors, participating agencies, and the general public
- Computer literate with experience in MS Office Word and MS Office Excel
- Building Performance Institute certification as a Building Analyst Professional a plus
- Massachusetts DHCD Energy Auditor certification a plus
