

**Interpretation to HPXML
Window Area Data Element
Approved by BPI Working Group 5
June 5, 2015**

Question: There is ambiguity with the way window areas are specified in HPXML. The following clarification is requested.

Given the following Window element:
18 4

Which way is this interpreted?

- 4 windows with an area of 18 square feet *each*.

Or

- 4 windows with an area of 18 square feet *total*.

Interpretation: Window element [18 4] is interpreted as 4 windows with an area of 18 square feet total.
