

e3 Solutions LLC is hiring a Home Performance Lead Technician to serve our NW Arkansas territory.

This is a hands-on in the field position that will involve direct implementation of e3 Solutions' residential home performance plan. The primary responsibility is to improve the performance of residential homes and apartment buildings with best results practices and professionalism. Experience welcomed but not required. We will train the right person. The right person will possess the following characteristics:

- Strong organizational skills
- Ability to communicate effectively
- Good work ethic
- Thrives in environments others find stressful
- Goal oriented

\$60,000 to \$80,000 depending on experience

Responsibilities include:

- Blower door and duct blaster testing
- Combustion safety testing
- Assessing homes to determine home performance measures that will have the greatest impact in reducing home energy demand and improving comfort.
- Supervising an employee(s) to assist you in the installation of home performance measures using best practices and professional results.
- Documenting condition of home and measures installed including a customer home performance report

Truck required, fuel reimbursement offered.

Relocation to NW Arkansas required. Relocation assistance available.
