Join the BPI Team!

Building Performance Institute is growing. We currently have three open positions. Are one of these right for you? Click [here](#) to learn more and please share widely!

Customer Relations Representative

BPI is seeking a Customer Relations Representative to serve as our customers' primary point of contact via phone, email, or other channels. CRRs are experts in BPI's products and services, and have a vital role in helping customers understand and use our offerings. Most daily work is remote, with occasional onsite responsibilities. Must be physically located within the Capital District of New York State and/or Saratoga County.

Director of Program and Market Development

BPI is seeking a Program and Market Development Director to serve as the lead for increasing awareness of the need for BPI's standards and credentials in the market, while also expanding BPI's portfolio of contracts. The candidate will work closely with utilities, programs, and state energy offices. This position is fully remote, with 25% travel responsibilities.

Technical Project Manager

BPI is seeking a Technical Project Manager to provide project planning and management for initiatives such as development of standards, certification exams, and technical resources. Experience in home energy diagnostics, modeling, and work scope development, certification development, and project management are needed. This position is fully remote with occasional travel.

Siemen Scholarship Open

The Jon Siemen Memorial Scholarship honors the life, memory, and work of Jon Siemen, a beloved BPI team member who passed away in 2015. It advances weatherization careers for four awardees each year by enabling recipients **to take online and field exams** for BPI certification or certificate of knowledge at no cost.

BPI certification comes with great benefits, including free membership in Home Depot's ProXtra rewards program. With no spend minimum, you can [sign up today](#) and start earning cash back at dollar one.

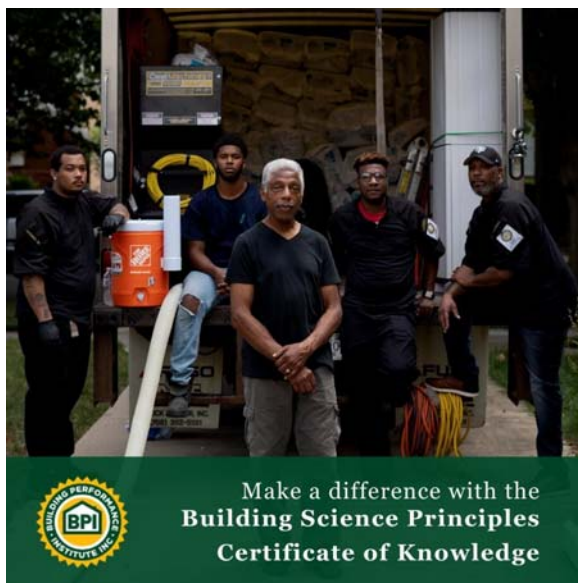

All BPI Stakeholders, including BPI Certified Professionals, BPI GoldStar Contractors, Proctors, Rater Companies, Test Centers, BPI Product Listing Program manufacturers, and CEU Providers, may enroll.

**Market Tax Credits
with Our Blog Post**

The IRA is bringing increased tax benefits for homeowners. Help your customers learn about the 25C Energy Efficient Home Improvement Tax Credit by sharing our [new blog post](#).

Get Started with the BSP

The Building Science Principles (BSP) Certificate of Knowledge is your first step into the world of energy efficient home performance. Home performance improvements are a critical first step in reducing carbon pollution and home energy burden.

The BSP will help you understand how the components of a home interact to affect its performance, which in turn affects health and quality of life for occupants. It provides a thorough foundation in building science in English or Spanish.

Get ready to make a difference for yourself and others with the **Building Science Principles Certificate of Knowledge**.

There are three principles that lead to success: direction, balance, and belief. We must focus our sights and efforts on what we want to achieve, keep a balanced perspective what's needed to remain sustainable in our efforts, and firmly believe in the importance of our work.

Successful people are believers. This session will discuss the success code for any organization, no matter what your definition of success is. We will define the "code"; the system of organizational success and discipline. Don't miss this informative webinar!

Join John Tooley, an award-winning Home Performance and Energy Efficiency Expert with over 40 years experience, to learn how to bring your dreams to life.

At BPI we're proud to use the Home Quiz from EDS to help customers understand how home performance work can affect their monthly budget.

The Home Quiz is a tool for customer education and engagement. By giving visualized estimates of potential savings, it can help customers understand how much they may have to gain by making improvements. To learn more about placing the Home Quiz on your own company website [click here.](#)

BPI's Healthy Housing Principles provide knowledge of how the different components of a home interact to affect occupant health.

The Healthy Housing Principles Reference Guide was authored by Kevin Kennedy, director of the Environmental Health Program at Children's Mercy Hospital Kansas City. It is an amazing compendium of knowledge on how homes affect health.

Anyone who works with families in their homes should consider earning the **Healthy Housing Principles Certificate**.

Are you looking to help friends and family understand job opportunities in

the clean buildings sector? The [Green Buildings Career Map](#) can help.

Residential & Multifamily Construction and Retrofitting includes occupations that specialize in energy efficiency, comfort, indoor air quality, health and safety, and durability of residential buildings.

The Career Map explores 14 careers in this category, their salaries, advancement paths, and more.

BPI's credentials directly support many of the careers listed. Explore career paths and share it with friends who are looking to make a great living through meaningful work. Learn more [here](#).

Building Performance Institute, Inc., 63 Putnam Street, Suite 202, Saratoga Springs, NY 12866

BPI sets national standards for improving comfort and energy efficiency and for creating and maintaining safe and healthy home environments. From these standards, BPI develops professional certifications for home contractors to ensure quality service and workmanship. BPI is a 501(c)(3) nonprofit organization.
