

Home Energy Assessment Team Members

Location: Merrillville, Indiana

Date: February 2020

Field Operations Manager

The Field Operations Manager directs and coordinates outreach, assessment, installation, troubleshooting, utility company contact, and reporting of Residential Energy Assessment program activities. In addition to managing inventory and operating expenses, the manager will ensure that establish standards, controls and budgets are maintained, and ensure optimum field service team members are meeting objectives. In addition, the ideal candidate will analyze operational performance data for reports, both internal and external and identify and rectify variations.

Energy Educators

The Energy Educator will provide field support for targeted outreach and lead generation for residential utility customers. The goals of successful outreach are to (1) provide prequalified leads to trade allies; (2) build and strengthen relationships with property management stakeholders, as well as community partners; and (3) conduct comprehensive energy assessments. BPA Certification preferred.

Direct Installers

We're seeking motivated and reliable installers of energy-efficient product for utility customers. With the goal of improving energy efficiency, the direct installer, will work alongside an energy educator, who leads energy efficiency education and assessment activities with the customer. You will install various EnergyStar measures such as LED bulbs, water-saving measures and pipe insulation in single-family and multifamily residence. You will track and report units serviced, incentives delivered, and manage product inventory. The ideal candidate will be ambitious, reliable, customer focused, and able to work long days, including nights and weekends, if necessary. BPA Certification preferred.

Insulation Technicians

Insulation and weatherization technician will install insulation and air sealing measures in homes. The ideal candidate has a solid understanding of construction and building science, as well as technical abilities and practical experience. The right candidate will have a strong desire to grow with the company and be committed to our goal of making an impact in the home performance contracting and energy efficiency market in the Midwest. BPA Certification preferred.
